

Rechargeable Motorized Floats
FX-RMF-B001-66IN-GB

OWNERS MANUAL

• IMPORTANT INFORMATION •

READ THIS MANUAL THOROUGHLY BEFORE USING

WARNING

Use of this product involves **INHERENT RISKS OF INJURY OR DEATH**. Follow all instructions and safety information below and in owner's manual to reduce risks.

- This is not a lifesaving or personal flotation device.
- Never use under the influence of alcohol or drugs.
- Never tow with watercraft or any other vehicle.
- Use only on still water. Never use in rapids or on snow.
- Know and obey all laws for the waterway being used. Wear a properly fitted life jacket approved by your country's agency (USCG Type III, ISO, etc) when required.
- Do not use in shallow water or near shore, docks, pilings, swimmers, watercraft or any other obstacles; product can be slippery when wet.
- Never jump onto or off of product; doing so may result in injury to yourself or others.
- Never swim underneath product.
- Never leave children unattended while in use.
- Always inspect item condition before each use. Do not use if damaged.

FOR CHOOSING US

ABOUT US

We are a vibrant and innovative North American pool essentials brand, dedicated to transforming backyard moments into luminous family memories through smart, energy-conscious designs that spark joy and redefine aquatic elegance.

BRAND MISSION

We exist to illuminate the heart of home by transforming pools into radiant hubs of connection. Through intuitive, adaptive lighting that mimics nature's warmth—from golden twilight glows to moonlit serenity—we craft environments where splashes become laughter, quiet dips spark conversations, and every evening swim strengthens family bonds. Our mission is to turn backyards into emotional sanctuaries, where cutting-edge technology fades into the background, leaving only the magic of togetherness. Because the truest light we create isn't in the water—it's in the memories families build beneath its glow.

NOTES

1. must use a power adapter that complies with GB4706.1-2005
2. This product should be used in an environment with a temperature greater than -20° and less than 50
3. Avoid high temperature environments such as direct sunlight
4. Please rest for 1 hour to allow the motor to fully dissipate heat before continuing to use if used continuously for 40 minutes.
5. Please stay away from harsh environments as any adverse effects on the product may endanger your safety.

Operational safety and maintenance

1. Do not expose the product to high temperatures or around heating devices such as sunlight, heaters, microwaves, ovens, etc., where temperatures exceed 50°C. Overheating the battery may cause an explosion.
2. Do not use the charger in damp places, and do not use wet hands to plug and unplug the charger.
3. Please dispose of this device, battery, and other accessories according to local regulations. They cannot be disposed of as household waste. Improper disposal of the battery may cause battery explosions.
4. Do not store lithium battery products for a long time when the battery is completely discharged. Lithium battery products should be charged at least every three months during storage.
5. Please charge the battery after use to extend its lifespan.
6. Please store in a dry place.
